

ARH Group have become a trusted partner over the years. Their understanding of our sites and approach means work gets done efficiently, safely and without impacting the care we deliver.

**Leading Veterinary
Care Provider**

Specialist compliance and maintenance for animal healthcare environments.

The Challenge:

Veterinary practices require careful coordination of FM activity to avoid disruption to consultations, procedures and the wellbeing of animals and clients. Services must meet healthcare-level standards while accommodating varied practice layouts and operational pressures.

The Approach:

- Coordinated planning with individual practice managers to schedule works during low-impact hours
- National delivery of EICRs, with 100% coverage across the estate
- Installation of specialist X-ray equipment in line with strict specifications
- Bespoke lighting and electrical fit-outs designed for clinical and animal welfare requirements

The Results:

- Long-term relationship built on consistent delivery and mutual trust
- Zero disruption to clinical care through careful planning and out-of-hours works
- Regulatory compliance across all sites
- Enhanced comfort and reliability in practice environments nationwide
